PROJECT

- **Staff — JS,J Query**
  A Staff Management System project typically involves developing software to efficiently manage various aspects of an organization's workforce. This system usually includes features like employee information management, attendance tracking, scheduling, payroll processing, performance evaluation, and sometimes even training and development modules.

- **Sequence No Library — JS,J Query**
  A Sequence Number Library project involves creating a software component or module that generates unique sequential numbers. These numbers are often used for various purposes such as transaction IDs, order numbers, invoice numbers, or any other scenario where a unique, sequentially increasing identifier is needed.
